What are Intertec protective cabinets & shelters?

Comprehensive protection solutions that perform more functions than conventional protective cabinets. INTERTEC protective cabinets and shelters have a modular design consisting of insulated wall elements, doors, floor and roof elements.

What is the difference between cabinets and shelters?

The only difference between cabinets and shelters is that shelters can be entered, while the equipment in cabinets can also be operated from outside. Ask our experts, to find the right solution for your application.

What are European style cabinets?

European style cabinets are popular for their classic, timeless look, and are often seen in contemporary and traditional kitchens. Euro-style cabinets offer a variety of advantages over traditional cabinets.

How is a shelter insulated?

The panels / walls that make up the floor, the walls, the roof and the door of the shelter are insulated with self-extinguishing polyurethane foam injected hot under pressure, density 40 Kg / mc, able to provide protection from atmospheric agents and sudden changes in temperature. external.
