What is the European market outlook for battery storage?

The move builds on the success of SolarPower Europe's annual European Market Outlook for Battery Storage, an established point of reference in the energy sector. Dion Sud continued: "The EU currently has just over 50 GWh of battery energy storage systems (BESS).

How many new battery energy storage systems will be installed in Europe?

The latest analysis by SolarPower Europe shows that 17.2 gigawatt hours(GWh) of new battery energy storage systems (BESS) will be installed in Europe in 2023, supplying 1.7 million additional European households with electricity - an increase of 94% compared to 2022.

What is the battery storage Europe platform?

BRUSSELS, Belgium (Tuesday 1 July 2025): SolarPower Europe has officially launched the Battery Storage Europe Platform, a major new initiative to drive forward the business case and regulatory framework for battery storage across the European Union. Juhi Dion Sud, newly appointed Head of the Battery Storage Europe Platform, said:

Are large battery storage systems gaining ground in Europe?

Solar park, substation and battery storage facility in Brandenburg/Germany. The European market for battery storage systems is growing rapidly; solar home storage systems have dominated until now. But now there is a change. Large batteries are gaining ground- but are still being held back by regulatory hurdles.

Dyness is a global research, development and manufacturing company of solar energy storage battery systems, providing high voltage, low voltage ...

As the leading EU voice for solar - the sector driving significant demand for battery storage - SolarPower
