The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a final environmental impact statement (EIS) for the Jacksonville Project ...

Construction of the project is scheduled to be commenced in the second half of 2019, while commissioning is planned for 2021. Jacksonville LNG project location The ...

Compressed-air energy storage, a decades-old but rarely deployed technology that can store massive amounts of energy underground, could soon see a modern rebirth in ...

Compressed air energy storage (CAES) is one of the many energy storage options that can store electric energy in the form of potential energy (compressed air) and can be deployed near ...

SRP is seeking a non-lithium-ion, non-inverter based LDES technology as a pilot at its coal-fired Coronado Generating Station (CGS) in St. Johns, Arizona.

Repsol's Saint John LNG import facility in New Brunswick, Canada has selected Galileo Technologies to provide its boil-off gas ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

SRP is exploring the option to add a cutting edge energy storage system to the Coronado Generating Station site in St. Johns for power generated by ...

Coronado generating station (CGS), owned and operated by Salt River Project (SRP), is a 773MW coal-fired

power station located ...

This innovative project aims to address the challenge of boil-off gas (BOG), a common problem in the LNG industry. Traditionally, BOG is compressed and sent back to the ...

Let's face it - when most people hear "energy storage center," they imagine a room full of AA batteries. But the St. John's Billion Energy Storage Center is about as basic as a ...

St. Johns County Reclaimed Storage Tank at Anastasia Island -- The project included the construction of a 1 MG ground storage tank and high service pumps to complement existing ...

The Salt River Project is exploring the option to convert a portion of the Coronado Generating Station in St. Johns into a cutting edge energy storage system for power ...

This innovative project aims to address the challenge of boil-off gas (BOG), a common problem in the LNG industry. Traditionally, ...

Take a behind-the-scenes look at our St. John Compressor Station Project in Indiana! ? This project is now in-service, replacing seven compressor units...

Demonstration Projects: Demonstrate projects incorporating novel CAES strategies, including novel system types (e.g., isothermal, adiabatic) and approaches to storage (e.g., pipeline ...

Project Background Westcoast Energy Inc. (Westcoast) filed an application with the Canada Energy Regulator for the Aspen Point Program Project (Project). The Project will ...

The operations maps depict where our assets serve your communities. Learn more about our natural gas and power projects and assets, including ...
