What is EPC in Thailand?

Meaning EPC stands for Engineering, Procurement, and Construction. In the context of the Thailand Power EPC market, it refers to the comprehensive process of designing, procuring materials and equipment, and constructing power projects such as power plants, transmission lines, and distribution networks.

Who is responsible for establishing an EPC project in Thailand?

The single company or vendor takes the entire responsibility of designing and establishing the project. Thailand's increasing power demand has encouraged various industry players, from new entrants to emerging players to enter in the Thailand EPC power market. The country had 11800 MW renewable capacity in 2019.

Which companies are in the Thailand power EPC market?

The Thailand Power EPC Market is moderately consolidated. Some of the major companies (not in particular order) include Mitsubishi Hitachi Power Systems, Ltd, Marubeni Corporation, General Electric Company, Poyry PLC, Black & Veatch Corporation, and others.
