Denmark has taken a major step toward greater energy independence by bringing online the largest integrated solar power and battery storage park in Northern Europe. The ...

The so-called Longship project is due to be the world's first large-scale carbon capture and storage hub for industrial emissions. ...

Denmark has unveiled Northern Europe's biggest solar and battery park with 200 megawatt-hours of storage for grid stability and clean power.

Matrix Renewables has signed a turnkey agreement with Tesla to develop a 1 GWh battery energy storage system in Scotland, marking its first standalone project of this kind in the UK.

Alex Thornton, operations director at Harmony Energy, gives us a deep dive into Pillswood, the biggest battery storage project in Europe.

The Northern Lights project is expanding its carbon capture and storage (CCS) capacity, with the big oil firms making their final investment ...

Ireland-based renewable energy and storage firm Gaelectric has formally filed a planning application and environmental impact assessment for its 330MW compressed air ...

EVE Energy and Vimab BESS are to roll out 1.48 GWh of energy storage in Northern Europe to support the region's clean energy ...

The first project is just going to be realised in Finland for Neoen, one of the most important independent

producers of renewable energy in the world and will become the largest ...

This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions ...

EVE Energy and Swedish energy storage system integrator Vimab BESS have signed a three-year memorandum of understanding ...

The first phase of Northern Lights is part of Longship, the Norwegian Government's full-scale carbon capture and storage project. Northern Lights will transport and ...

The first of Italy's new energy storage capacity procurement auctions (MACSE) will take place on September 30, 2025.

Northern Lights is the world's first commercial CO₂ transportation and storage project, playing a key role in Norway's plan to reduce emissions and lead global efforts in ...

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates.

The project marks only the first step in battery storage deployment for Danish renewable energy developer European Energy, which plans to add more than 1 GW of battery ...

European Energy has energised the Kvested solar-and-battery park in Denmark, turning an existing PV site into what the company says is Northern Europe's largest co-located solar-plus ...

The first 4-hour battery storage project in Ireland exemplifies challenges and opportunities of the country's growing and evolving market.
