---

The two segments of the Tokur hybrid power plant will span 75 hectares and 2.2 hectares, respectively. In addition, the utility is ...

Progresiva, a subsidiary of Kontrolmatik Technologies, is set to embark on Türkiye's largest grid-scale energy storage project in ...

Rolls-Royce has been awarded a contract by Polat Enerji, a Turkish investor in the renewable energy sector, to supply a large-scale ...

A Turkish firm on Wednesday said it had signed Türkiye's largest battery energy storage system supply agreement with Rolls-Royce to increase the capacity at a wind power plant in the ...

By integrating storage solutions, generation plants can ensure a steady energy supply, optimize grid stability, and enable greater reliance on renewable sources like wind and solar. This ...

The Government of Turkey aims to almost quadruple wind and solar power capacity to 120 GW by 2035, according to the new ...

While storage is the visible technological enabler, infrastructure is the invisible foundation of the energy transition. Every new renewable power plant requires not only ...

SMR technologies will play a key role in meeting Türkiye's growing demand, replacing existing coal power plants, and providing support to green hydrogen. SMR power ...

Türkiye is pressing ahead with critical projects in renewables and nuclear energy, according to Energy and Natural Resources Minister Alparslan ...

The world is racing to integrate clean energy at scale, and Türkiye is uniquely positioned to supply the backbone infrastructure. The recent partnership on Battery Energy ...

Traktek to install 50 MW wind park with matching storage Traktek Enerji has just received approval for the environmental impact ...

To bolster supply security and reduce import dependence, Türkiye is prioritising the expansion of domestic and renewable energy sources and commissioning its first nuclear ...

Every new renewable power plant requires not only storage solutions but also substantial investment in transmission lines, substations, and grid reinforcement. Türkiye's ...

In Türkiye, demand for electricity is surging. With a growing -- and urbanizing -- population, the country ranks 15th in the world in ...

In Türkiye, demand for electricity is surging. With a growing -- and urbanizing -- population, the country ranks 15th in the world in annual energy production, outpacing several ...

Türkiye is eyeing completion of a US\$1 billion clean energy investment agreement with UAE-based renewable major Masdar, focused on developing a 1,100 MW solar power ...

Rolls-Royce has been awarded a contract by Polat Enerji, a Turkish investor in the renewable energy sector, to supply a large-scale battery energy storage system (BESS) with a ...

Turkey plans to build 80 GWh of capacity by 2030, aiming to become a regional center for battery technology production and investment.
