Why is coal mining important in Ukraine?

Coal mining has historically been an important industry in Ukraine. Although the industry is often associated with the coal-rich Donets basin in the east of the country, other coal mining regions include the Lviv-Volhynian basin and the Dnieper brown coal mining basin. The Donets basin is Ukraine's most developed and largest coal mining region.

Will Ukraine power without coal by 2040?

Ukraine's biggest private utility, DTEK, also joined the Alliance, adding, however, that it was committing to powering operations without coal by 2040, not 2035. Ukraine is a member of the Energy Community Treaty, which requires members to meet the obligations of the Large Combustion Plants Directive.

What happened to Ukraine's coal plants in 2022?

In 2022, Russian occupiers took control of four of Ukraine's coal plants with over 4,000 MW of capacity. The operating capacity of coal plants in the country was more than halved between 2022 and the beginning of 2023.

What is the history of coal mining in Ukraine?

Coal mining has historically been an important industry in Ukraine. Coal first started to be produced in Ukraine in 1870, when it was part of the Russian Empire. In 1913, Donetz produced 87% of Russia's coal, and 50% of the metallurgical coal of the USSR.
