What is a National Plan of Integrated Airport Systems?

167;47103. National plan of integrated airport systems (a) General Requirements and Considerations.-The Secretary of Transportation shall maintain the plan for developing public-use airports in the United States, named "the national plan of integrated airport systems";.

What is the National Plan of Integrated Airport Systems (NPIAS)?

The National Plan of Integrated Airport Systems (NPIAS) identifies over 3,000 existing and proposed airports which are included in the NAS(National Airspace System). It includes all commercial service airports and all reliever airports.

Are national system airports eligible for federal funding?

National system airports are eligible to receive federal funding from AIP grants for infrastructure development.

What is a national airport system?

The national airport system reflects the types of aircraft using the airfields, passengers using the terminals, and associated economic activity. These users include commercial airline service, air cargo, general aviation, military, drones and unmanned aircraft systems (UAS), advanced air mobility (AAM), and commercial space launches and reentries.
