-----  
Are battery energy storage systems approved in Victoria?

Authored by: Partner Stephanie Vatala and Associate Jake Meyers The nature and size of battery energy storage systems (BESS) varies considerably, as can their planning approval pathway depending on their location. In Victoria (Vic), there are limited approval pathways for BESS projects.

How many energy storage projects are there in western Victoria?

In March 2018, 2 projects in Western Victoria were chosen to be part of The Energy Storage Initiative - one in Ballarat and one in Gannawarra. Construction for the Ballarat and Gannawarra Energy Storage Systems was completed in late 2018. Both batteries began operating over the summer of 2018 and 2019.

How many large-scale storage systems does Victoria have?

Victoria has 12 commissioned large-scale storage systems and 3 in commissioning - with a total output capacity of 1028 MW and storage capacity of more than 1.7 GWh. Storage capacity = how much total energy is stored in each battery. Output capacity = how much energy a battery can provide at a given time.

What is the Acenergy battery energy storage project?

As it happens, it was an Acenergy battery project that was first to be approved under Victoria's fast-track program; the Joel Joel Battery Energy Storage Project being developed in Victoria's Wimmera region at the same size and duration (350 MW/700 MWh) as the Little River BESS.

Its integrated four-hour battery energy storage system will ensure a steady supply to the grid, powering roughly 150,000 homes. ...

Just 10 kms from BC's capital city of Victoria, Colwood is a fast growing, family-friendly seaside community of approximately 17,000 people that enjoys a rich heritage, unique connection to ...
