Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are secret cellular radios inside solar inverters & solar batteries?

According to Reuters, experts have discovered secret cellular radios and other communications gear inside solar inverters and solar batteries made by Chinese companies. These components are widely used in U.S. infrastructure to connect solar panels to the grid and store solar energy.

Are Chinese solar inverters hidden inside solar panels?

But the implications were massive. This was just one of several similar discoveries over the past year. According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of these hidden Chinese devices embedded inside.

Are Chinese power inverters being used on solar panels?

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are devices separate from power sources like solar arrays or batteries.

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar ...

Solar power is a great option for properties that are well off the grid, like farms and rural homes. However, to take full advantage of this clean ...
