Why is Samoa launching a new electricity source?

The launching of a new electricity source that will benefit up to 5,000 families on the north-western side of the island of Upolu, is a milestone for Samoa's renewable energy efforts. It is also a significant contribution to the country's climate action commitments.

Does Samoa have a solar farm?

The Asian Development Bank (ADB) and Sun Pacific Energy Ltd (SPEL) have signed a US\$2.8 million (approximately AU\$4.3 million) loan to expand renewable energy generation in Samoa. The financing will upgrade and expand SPEL's Upolu Solar Farm--Samoa's first independent power producer (IPP)--by installing high-efficiency solar panels.

What are the main energy sources in Samoa?

ne, LPG and electricity. Hydro Power - Contribution from hydro power to the overall energy production in Samoa over the years have been decreasing considerable from a general annual generation of 3.9- 4.9ktoe in the early 2000 to average of 2.8Ktoe in the last three years. This has reflected a drop of

Where is Samoa's power plant located?

The plant, located at Faleolo International Airport, operates under a 20-year power purchase agreement with the state-owned Electric Power Corporation. Samoa has faced mounting pressure on its power grid, with prolonged outages caused by generator failures, storm damage, and surging demand.
