Where can I find a full dataset of New York solar projects?

If you would like to dive deeper into the underlying data, download the full dataset at OpenNY. In addition, you can access large-scale solar projects that participate in New York's wholesale energy markets (projects larger than 5MW AC) as they are not included in this dataset.

What is a distributed solar project?

Distributed solar projects are typically installed on rooftops, carports or other built-environment locations for homes and businesses. Through NY-Sun, the New York State Energy Research and Development Authority (NYSERDA) provides financial incentives for the installation of approved, grid-connected solar installations.

How do I access large-scale solar projects in New York?

In addition, you can access large-scale solar projects that participate in New York's wholesale energy markets (projects larger than 5MW AC) as they are not included in this dataset. To get started, click on the map for county-specific data or hold Ctrl and click multiple counties. To see statewide data, click outside the map.

Will NYSERDA reinvest \$150 million in a solar project?

NYSERDA will reinvest 36% of the surplus (\$150 million) back into the NY-Sun program on the condition that the funds be used for solar projects that directly benefit low-income customers. New York's goal to build out 10 GW of distributed solar projects by 2030 is not only expected to be achieved ahead of schedule, but also under budget.

Located at the crossroads of Europe and Asia, this facility combines 48 MW wind farms, 32 MW solar arrays, and a 60 MWh battery storage system, achieving 92% grid reliability in 2023 trials.
